

Important Cybersecurity Questions to Ask

2023 Christian Leadership Alliance Outcomes Conference

Session Description

IT now touches every aspect of operations, and cybersecurity today is a critical responsibility shared among many individuals across your organization. Learn key questions to help assess whether your organization is reasonably protected.

Learning Objectives

- Review critical cybersecurity areas of focus for your organization
- Identify questions you can ask to help assess potential cybersecurity issues
- Apply recommended responses and best practices

Outline

- Current state of cybersecurity
 - Recent breaches
 - Cybersecurity trends
- Do we have the right culture?
 - Leadership
 - Training
 - Budget
- Do we know what we have?
 - Asset management
 - Shadow IT
 - Data inventory
 - Vendor management
 - Network diagrams
- Do we have layered security?
 - Vulnerability management
 - Ransomware mitigations
 - Authentication controls
- Do we hold our vendors to our internal standards?
 - Identification and classification
 - Contracts
 - Due diligence
- Can we identify a potential issue and do we have the capabilities to respond?
 - Monitoring
 - Incident response planning
 - Business continuity and disaster recovery planning
 - Plan testing
